

2022 AURORA BIGFOOT

It's been said that this machine was bred for one purpose. Mudpit Retribution. For those who crave the raw torque of the 950 EFI Big Block™ V-Twin and the courageous souls seeking to muster the mudslinging madness, no XTV has more power than Bigfoot. The Aurora 950 Bigfoot MX8 emerges with a low-bellowing growl in search of its next run through the abyss.

The ARGO Aurora 950 Bigfoot MX8 is more than fictional folklore, it's about a timeless experience found within the passion for innovation and ingenuity. The Bigfoot's integration of the All-new ITDS and ITC paired with the Admiral transmission and APS, transfers power to all 8 wheels for straight-line performance and is capable of reaching speeds up to 24 mph (39km/h) on land.

Navigating challenging terrain is made easy with ARGO Progressive Steering (APS) - the revolutionary drive-train that effortlessly maneuvers around obstacles and provides confidence inspiring and smooth predictable turning on dry land.

One look at the Aurora Bigfoot 950 MX8 and you'll gain a new level of respect for an Amphibious XTV's capabilities. The brawny 25-inch mud tires mounted to AirLock rims allow for the air pressure to be lowered to a mere 1.5 psi for the ultimate grip. Adding to the Bigfoot's 10-inches of ground

clearance and rugged demeanor is the durable all-terrain amphibious body. Constructed of high-density polyethylene the Bigfoot features fully amphibious capabilities and glides over stumps with unparalleled stability and control.

Equipped with a front brushguard and an integrated 3,500-lb WARN winch, the Bigfoot is capable of offering a helping hand when needed.

The Aurora 950 Bigfoot MX8 has a 1,060 lb dryland load capacity and comes equipped with a 2-inch rear receiver capable of towing 1,800 pounds. New 8.5-gallon (32 liter) fuel tank and newly engineered digital fuel gauge is optimized for extended runtime ensuring endless hours in the backwoods. The Aurora 950 Bigfoot MX8 is an 8x8 model accommodating four passengers and is offered in black.

All-Terrain Amphibious Body

Evolved and refined from more than 55 years of amphibious vehicle development, the one-piece high-density polyethylene (HDPE) lower body is ARGO's signature design feature. The smooth and durable underbody floats over potential snags, stumps and outcrops as well as wetlands and mud, keeping water hazards out while delivering unparalleled stability and control.

Load and Towing Capacity

The Aurora 950 Bigfoot MX8 XTV is engineered to haul and tow the necessary equipment for diverse recreational activities. Built for four occupants, the Bigfoot offers a towing capacity of 1,800 pounds (816 kg) with a land load capacity of 1,025 pounds (465 kg).

Ground Clearance

With 10 inches (254 mm) of ground clearance, the ARGO Aurora 950 Bigfoot MX8 XTV provides maximum maneuverability in the roughest terrain.

Quiet Muffler

Our quiet muffler helps reduce radiated noise from the vehicle, making for a more enjoyable ride for passengers and drivers.

Hydraulic Steering Brakes

Every ARGO XTV is equipped with hydraulic steering brakes for powerful, controlled steering in the full range of conditions and terrain. These brakes are activated via the handle bar to control the power output from the transmission to the wheels on either side of the machine.

Admiral Transmission

ARGO Aurora 950 Bigfoot MX8 XTV features the premium Admiral transmission, with APS, which employs a sophisticated gearing system and dual differentials on the output shafts ensuring that, when steering, the braking force is applied to a steering differential (rather than the output shafts), translating into smoother and gentler steering. In high range, it steers smoothly and, in an arc, similar to a conventional SxS. In low range it operates similar to a traditional skid steer vehicle, offering zero-radius turning. It's capable of reaching speeds of up to 24 mph (39 km/h) on land.

ARGO Low-Pressure Mud Tires

The XT119 25-inch tires on the Aurora 950 Bigfoot MX8 are right at home when traversing unforgiving mud pits, saturated dirt and soils and washed-out terrain. Engineered to be highly resistant to damage from cuts, impacts and hazardous snags, the large-paddle tires feature a tread design that's tied to the sturdy sidewalls for quick steering response, improved cornering stability, and enhanced protection from obstacles under the earth's surface. As a system with Steel AirLock rims, they apply just 1.5 psi of ground pressure, dispersing pressure while achieving maximum traction over all surfaces.

Dependable 4-Stroke EFI Engine

The Aurora 950 Bigfoot MX8 XTV is powered by a dependable fan-cooled V-twin 4-stroke gas engine that produces 40HP. It features electronic fuel injection (EFI) for sure starts and automatic air- and temperature-compensation in all climate conditions, including high altitudes.

New Instant Torque Drive System (ITDS) & Instant Torque Clutching (ITC)

The ARGO Instant Torque Drive System (ITDS) delivers dramatically improved performance by coupling the new ARGO Instant Torque Clutch (ITC) with the versatile Admiral transmission. The Instant Torque Clutch (ITC) loads the engine to maintain peak torque resulting in increased acceleration and enhanced torque. Alleviating the need for a High Torque (HT) transmission while maximizing the appealing capabilities of the Standard Torque (ST) transmission, we have combined acceleration, torque and speed into one package.

Aluminum AirLock Rims

The Aurora 950 Bigfoot MX8 features premium aluminum AirLock rims that deliver custom styling while mechanically locking the tire bead to the rim. With each tire firmly secured to its rim, an incredibly low 1.5-psi tire pressure provides a smoother, more comfortable ride over rough terrain as well as maximum performance in mud.

3,500 lb. WARN Winch

The Aurora 950 Bigfoot MX8 comes equipped with a 3500 lb WARN Winch making this model ideal for versatile applications. The winch is conveniently operated via an on-dash actuator

Bilge Pump

Offered as a standard feature on all Amphibious ARGO XTVs, the built-in bilge pump quickly and effectively evacuates water that may enter an ARGO XTV.

New 8.5 Gallon Fuel Tank

New for 2022, the Aurora 950 Bigfoot MX8 features a large 8.5-Gallon (32 liter) fuel tank. Optimized for extended run-time, the new digital fuel level is incorporated into the multi-function premium gauge on the dash for increased visibility.

2022 ARGO XTV

AURORA

950 BIGFOOT MX8

ENGINE

CYLINDER	V-Twin
FUEL SYSTEM	EFI
COOLING	Fan Cooled
ALTERNATOR OUTPUT (MAX)	50 AMPS
MAX. POWER	40 HP

DRIVETRAIN

TRANSMISSION TYPE	Admiral with APS
DRIVE BELT	Heavy Duty
SERVICE BRAKES	Hydraulic
STEERING BRAKES	Hydraulic
BRAKE COOLING FAN	Accessory
AUTO CHAIN LUBRICATION	Accessory
SPEED ON LAND	25 mph [40 km/h]
SPEED ON WATER	N/A

DIMENSIONS/WEIGHT

LENGTH	126 in [3,200 mm]
WIDTH	60 in [1,524 mm]
HEIGHT	51 in [1,295 mm]
LOAD CAPACITY - LAND	1,060 lbs [481 kg]
LOAD CAPACITY - WATER	860 lbs [390 kg]
TOWING CAPACITY	1,800 lbs [816 kg]
FUEL TANK CAPACITY	8.5 gal [32 L]
RIDER CAPACITY - LAND	4
RIDER CAPACITY - WATER	4

TIRES & WHEELS

TIRES - ARGO	XT119 25 x 12 - 9
WHEEL	Steel AirLock
GROUND CLEARANCE - TIRES	10 in [254mm]
GROUND CLEARANCE - TRACKS	11 in [279 mm]
GROUND PRESSURE - TRACKS	N/A

FEATURES

AXLE BEARING EXTENSIONS	Standard
FRONT RACK	Accessory
BRUSHGUARD	Standard
WINCH	3,500 lbs
FULL SKID PLATE	Standard
ROPS	Accessory
STRETCHER FRAME	Accessory
BILGE PUMP	Standard
ENTRY STEP	Accessory
AVAILABLE COLORS	Black
